

# Lesson 2 – Robot assembly

## ArduSkyBot 2012 Summer Workshop

Today you will learn:

- **Components of our robot**
- How to **build the ArduSkyBot!**
- Simple **programming examples**
- You will program **your own sequences!**

# ArduSkyBot's features

**Push buttons**

**Frontal distance sensor**

**Two light sensors**

**Lots of LED lights**

**Speaker**

**Line sensor**

# What can the ArduSkyBot do?

Some examples:

- Follow light
- Line follower
- Avoid obstacles
- Play music tones

# ArduSkyBot kit contents

# Assembly of the ArduSkyBot (1)

# Assembly of the ArduSkyBot (2)

Note cable orientation!

# Assembly of the ArduSkyBot (3)

# Printshield connections

# Assembly of the ArduSkyBot (4)

# You have built an ArduSkyBot!

**We will add the line sensor  
in following lessons!**

# Now we can begin with the programming!
